14th

Biennial of Animation Bratislava

8 – 12 October 2018

PROGRAMME

The Biennial of Animation Bratislava has earned a special place on the map of international festivals due to the fact that it is a one-of-a-kind festival, focusing exclusively on animation intended for children. The Festival's mission is to foster artistic confrontation in the field of animation intended for children, keep track of its interconnection with illustrations, create conditions for the evaluation thereof and hence support the complex development of this unique kind of art. The BAB reflects the first class non-commercial audio-visual culture for children by means of animated films.

The Festival incorporates an international competition featuring interesting animated films for children from all over the world. There is an international jury that decides about the competition winners and awards prestigious prizes. Among important features of the Festival are profile screenings and presentations of important animation personalities, a discussion forum as well as animated film workshops. In addition, the Festival covers unique exhibitions related to animated films. We can hint that you will find fairy tales everywhere!

We invite you to join us on this adventurous journey with animated films. Let's go around the world in 5 days!

FREE ADMISSION to all performances and accompanying events.
